

Smoke Escape Mask

**Safeguard Yourself with Venus COGO Smoke Escape Mask;
You can never be too prepared!**

Venus Cogo Smoke Escape Mask

As the name suggests it's a personal respiratory protective device intended for self rescue during emergency situations where smoke and hazardous gases are present. The COGO provides users with short term respiratory protection against smoke and carbon monoxide (CO) inhalation and filters out gasses such as Hydrogen chloride (HCl), Hydrogen Cyanide (HCN), Propenal (Acrolein) etc.

The COGO mask combines small size and light weight for easy access, functional design for easy use with high efficiency multilayer filter, elastic hood and large visor for maximum protection in an instant. It complies with European Standards EN-403 and is crafted to meet the unexpected fire emergency rescue situations with assured performance. So safeguard yourself with Venus COGO Smoke Escape Mask, because you can never be too prepared!

- 1 Flame Resistant Polychloroprene Rubber Hood**
Durable, High temperature resistant, Flame retardant
- 2 Flame Resistant Polyimide Visor**
Flame retardant, High temperature resistant, Transparent with wide field of view
- 3 Multi layer Filtration**
High-efficiency, electrostatic particle filter, with extremely low pressure-drop enables easy breathing
Multi-layer activated impregnated charcoal for maximum absorption of CO
- 4 Exhalation Valve**
Minimal dead space, prevents build of heat, Vapors & CO
Enables easy communication
- 5 Elastic Neck Opening**
For comfortable face seal
Seals quickly
- 6 Small Size, Light weight**
Compact & Portable
One Size fits all
